

NIEDNER 800

THE MOST RESILIENT SOLUTION

Since 1895, NIEDNER has been redefining the firefighting industry by creating lighter, more versatile lay-flat hoses to overcome the challenges firefighters face. What makes firefighters around the globe trust NIEDNER's fire solutions is first and foremost the high quality and resiliency of the products. Our hoses are engineered to stand up under the most demanding applications, including intense heat and abrasion.

PROVEN PERFORMANCE

Fire departments and emergency response teams across North America rely on our field-proven firefighting hose technology to combat small to large-scale fires. The unique attributes of our technology set the standard for the industry. NIEDNER 800 is NIEDNER's most popular attack hose. Lighter and more compact than competitive attack hoses, it is the number one choice for high-rise packs. NIEDNER 800 is easily handled and packs tightly for everyday attack firefighting. The waterway is oversized to maximize flow and minimize friction loss. With a third less bulk than rubber-covered hoses, NIEDNER 800 is flexible to -60°F (-51°C). The ENCAP™ treated outer jacket improves durability, reduces water absorption up to 40%, increases chemical resistance and allows for color options.

HIGHEST LEVEL OF QUALITY

NIEDNER maintains the highest levels of quality in the design, manufacturing, and testing of all our hose products. As a result, our solutions exceed the recognized international standards.

UNIQUE SERVICES

Our solutions have many advantages; quality, design, and engineering support, which is second to none.

Attack Hose

High-Rise Applications

Short lead-times

Rugged and Durable

**Standard lengths:
50/100 feet**

**Manufactured in
accordance with NFPA
1961 standard**

Formally known as XL-800

FEATURES

- Abrasion and puncture resistant high pressure performance
- Increased kink resistance and GPM flow
- Ozone, age, mildew and bacteria resistant

DESIGN

- Made of 100% polyester
- Lined with a TPU elastomer
- ENCAP™ treated outer jacket

ADVANTAGES

- Lighter and more compact than competitive attack hoses
- Easy-to-handle and packs tightly for everyday attack firefighting
- Reduced water absorption up to 40%
- Flexible to -60°F (-51°C)

Manufactured in North America.
 Covered by NIEDNER's 10-year warranty.
 All NIEDNER products are dried before shipping.
